PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

---

PROJECT NUMBER: 6034

SESSION NUMBER: 02

DATE OF SESSION: 19 JUN 89

DATE OF REPORT: 19 JUN 89

START:

END:

METHODOLOGY: SOLO

VIEWER IDENTIFIER: 032

---

1. (S/NF/SK) MISSION: Determine, access, and identify the nature and location of a nuclear electrical producing plant in Seabrook, New Hampshire.

2. (S/NF/SK) VIEWER TASKING: Describe purpose and function of the "plant" perceived in Session 01.

3. (S/NF/SK) COMMENTS: No inclemencies noted. A summary of information is attached to this report. Purpose and function (type of energy) not identified. A search will be attached to the end of this project.

4. (S/NF/SK): EVALUATION: (3)

#### SUMMARY OF INFORMATION

The Target is a large expansive building. Inside the building there are containers, storage sites, areas where things are locked away and barrels. The entire site appears to be suspended above some murky, green liquid which has an oily looking slick above it. This stuff is reflective, it's dark and there is the smell of creosote all around.

There is a great deal of activity in and outside the structure. Trucks are moving about, people walking. The floor is dirty -- this appears to be a working place, a warehouse or some kind of plant. I could not determine what exactly was being accomplished -- it appears to be a number of things rather than just one. It certainly isn't a white collar facility, unless there is an area I have been missing.

People work long hours here -- in fact it may even have shifts working around the clock. The area is hot and humid beyond belief. I had to break because of difficulty in breathing.
